NORTHSTAR - PROJECT REQUEST

We need a bilingual web interface in Croatian and English for our 35-person consulting team.

Employees must search internal documents and see exact source citations for every answer.

The workspace must integrate with one documented CRM API to display customer context.

We need an evaluation dataset and human approval before an external response is sent.

DELIVERY AND OPEN QUESTIONS

We require a deployment guide and a team handover workshop.

The project should be delivered in six weeks.

We also require 24/7 telephone support and guaranteed 99.99% availability.

Our CRM API documentation and data retention policy will be provided after discovery.
